

**Binay Maharjan**

**Bertram Street, Dianella, WA,6059**

**Software Engineer | Web Developer**

[Linkedin](#) ~ [0451278044]

---

Web Developer with experience in front-end. Proficient in HTML, CSS, JavaScript, and frameworks like ReactJS for creating responsive and user-friendly web applications. Demonstrated ability to work on complex projects, such as commercial websites and responsive single web application sites with a focus on performance optimization and code maintainability. Passionate about continuous learning and staying updated with emerging technologies to drive innovation in web development

<b>Availability</b>	Immediately
<b>Visa Status</b>	Have legal authorization to work in Australia without any conditions.
<b>Expected Salary</b>	\$75K / negotiable
<b>Australian Driving License</b>	Available
<b>Transportation-car</b>	Available
<b>Languages</b>	Competitive English, Hindi, Nepali, Dialects (Newari)

**Professional Experience:**

- **Team Lead Web Developer at Nepali Coders [3years]** [GitHub](#)
  - Engaged in brand logo design, video editing, and web design using HTML and CSS.
  - Hosted and managed client websites using WordPress Elementor.
  - Customized themes and plugins to meet specific client requirements, ensuring a user-friendly and responsive design.
  - Implemented SEO best practices to improve site visibility and performance.
  - Designed unique and impactful brand logos for clients, enhancing their brand identity and market presence.
  - Ensured consistency in branding across all digital platforms and marketing materials.
  - Edited videos to create engaging content for websites and social media platforms.
  - Used video editing tools to produce high-quality visuals that aligned with client branding and marketing strategies.
  - Developed visually appealing and responsive web designs using HTML and CSS.

[binaymaharjan12@gmail.com](mailto:binaymaharjan12@gmail.com)

- Collaborated with designers to translate design mock-ups into functional web pages.
- Ensured cross-browser compatibility and adherence to web standards.
- Acted as the primary point of contact for clients, ensuring clear and effective communication throughout the project lifecycle.
- Gathered requirements, provided regular updates, and addressed client feedback promptly to ensure satisfaction and project success.
- **Front End Developer at Stalione [2.5yrs] [GitHub](#)**
  - Responsible for developing and maintaining the website including designing using Modern ReactJS, Redux, NodeJS. Strong background in responsive design and cross-browser compatibility.
  - Adept at collaborating with back-end developers to integrate RESTful APIs. Committed to optimizing web performance and ensuring accessibility standards.
  - Gaining knowledge about SASS/SCSS for efficient styling.
  - Skilled in version control systems, particularly Git, for efficient collaboration and code management.
  - Proficient in integrating front-end applications with RESTful APIs and enhancing performance.
  - Dedicated to maintaining high standards of web accessibility and usability. Excellent problem-solving skills with a keen eye for detail and a passion for learning new technologies.
  - Improved communication to work effectively in agile development environments.
  - Worked closely with senior developer and client to deliver expected result.
  - Communicated team for possible risks and limitation while implying new changes.
- **Front-End Developer at National Australian Bank (NAB) [3months] [GitHub](#)**
  - Created responsive web application design using ReactJS.
  - Conducted testing using JTest and managed project documentation with Confluence.
  - Developed and maintained dynamic and interactive web applications using ReactJS. Utilized components, hooks, and state management to build efficient and reusable code, ensuring seamless user experiences.
  - Collaborated with UI/UX designers to integrate visual and interactive elements.
  - Did comprehensive testing of front-end applications using JTest to ensure code quality and functionality.

- Closely worked with teammates to identify and resolve issues early in the development cycle, contributing to robust and reliable software releases.
  - Created and maintained detailed project documentation on Confluence. Documented codebases, project requirements, design specifications, and development processes to facilitate team collaboration and knowledge sharing.
  - Ensured documentation was up-to-date and accessible for all team members. Effectively managed project tasks and workflows using Rally.
  - Tracked progress, prioritized tasks, and ensured timely resolution of issues.
  - Coordinated with cross-functional teams to align development efforts with project timelines and goals.
  - Managed branches, conducted code reviews, and facilitated merge requests. Maintained a clean and organized code repository, adhering to best practices for version control and collaboration.
  - Skilled up in development tools like Docker streamline application deployment, container management, and continuous integration, enhancing efficiency and reducing downtime
- **Front-End Developer Intern at WebVine [3months]** [GitHub](#)
    - Developed custom web parts, extensions, and user interfaces using SPFx, which allows developers to use modern JavaScript libraries and frameworks like React.
    - Integrate with other Microsoft 365 services, APIs, and external systems, ensuring a seamless user experience.
    - Emphasis on client-side development, leveraging TypeScript, and JavaScript.
    - Ensured that SharePoint sites are responsive and work well on mobile devices.
    - Understanding of JTest and ensure compatibility across different browsers and platforms.
    - Create and apply custom themes and styles using HTML, CSS, Bootstrap, SASS.
    - Creating form validation and CRUD(create, read, update, delete) for sign up.
    - Debugged and exposed to functionality of SharePoint lists and libraries.
    - Attended daily stand-up meeting to create interactive user experiences.
    - Closely worked to build tools like Gulp, Webpack, and npm for automating tasks and managing dependencies.
    - Utilized version control systems like Git for managing code like merge or rebase.
    - Work closely with back-end developers to integrate with SharePoint's REST API and other external data sources.

[binaymaharjan12@gmail.com](mailto:binaymaharjan12@gmail.com)

- Learning of PnP JavaScript libraries for easier interaction with SharePoint data.
- Exposed to continuous integration and continuous deployment project environment such as Netlify, FireStore, and Jenkins.
- Performed caching strategies to enhance the speed and responsiveness of SharePoint pages.
- Improved the best practices in UX design.
- Iterate on designs based on client feedback and testing.
- Learning of security best practices, ensuring that custom code adheres to corporate and regulatory standards.
- Communicate with team in order to comply standards.
- Often work in Agile or Scrum teams, collaborating with other developers, designers, and stakeholders.
- Written documentation of the code and customizations for future reference.
- Gaining more confidence in HTML, CSS, JavaScript, TypeScript, React (SPFx, REST API, PnP JS).
- Extra learnings SharePoint Designer, Power Automate, Power Apps, version control systems like Git, and build tools like Gulp/Webpack
- **Front-End Tutor at Lalitpur, Nepal [2.5 years]** [GitHub](#)
  - Academic Support in Computer Programming: Provided comprehensive tutoring in computer programming, focusing on front-end technologies. Taught foundational and advanced concepts in HTML, CSS, and JavaScript, helping students build a solid understanding of web development principles.
  - Guided students through real-time projects to develop web applications based on Content Management Systems (CMS) like WordPress.
  - Facilitated hands-on learning experiences, enabling students to apply theoretical knowledge to practical scenarios.
  - Developed and structured the curriculum to align with industry standards and educational goals.
  - Created lesson plans, assignments, and project guidelines to ensure a thorough and engaging learning experience. Mentorship and Student Engagement: Acted as a mentor to students, providing personalized support and feedback. Encouraged critical thinking, problem-solving, and creativity in web development projects.
  - Maintained a supportive and motivating learning environment.
  - Conducted workshops and training sessions on essential front-end development tools and techniques.

[binaymaharjan12@gmail.com](mailto:binaymaharjan12@gmail.com)

- Covered topics such as responsive design, cross-browser compatibility, version control with Git, and integration with APIs. Assessment and Progress Tracking: Evaluated student progress through regular assessments and project reviews. Provided constructive feedback and tailored guidance to help students improve their skills and achieve their learning objectives.
- Helped students develop teamwork and communication skills essential for real-world development environments.

## **Education:**

- **Master of Information Technology**

- Federation University, Sydney, Sussex Street (2018-2020)

[Contribution videos](#) || [Project Link](#)

- ❖ **Major Projects [ Property Profile Listing ] Learnings: -**

- Requirement Gathering and Documentation
- Stakeholder Management
- Collaboration with Development Teams
- Continuous Feedback Loop
- Change Management
- Tools and techniques like JIRA, Confluence
- Risk Management
- Lessons from Failures
- Time Management
- Business Value Focus
- Share Knowledge
- Data Analytics
- Business Analytics

- **Bachelors degree in Information Technology**

- Punjab Technical University, Gujral Original Kapurthala, PB (2013-2015)

- ❖ **Major Projects[ College Management System] learnings:-**

- Object-oriented Programming
- Database Connectivity (Java Database connectivity)
- Create, Read, Update, Delete Operations
- Model-View-Controller(MVC architecture)
- User Interface Desing with HTML/CSS
- JavaScript for front-end Interactivity
- Exception handling
- Version control
- File Handling
- Security Considerations

[binaymaharjan12@gmail.com](mailto:binaymaharjan12@gmail.com)

➤ Project management

- **Professional Year**

- Completed with the Australian Computer Society (2021-2022)

**Skills:**

- **Frontend Development:**

- HTML5, CSS3, JavaScript, jQuery
- Modern React JS with Redux/Context API
- UI Design with Material UI, Bootstraps, Semantic UI
- Integration of REST APIs
- known uses of software tools like postman, and docker

- **Backend & Server-Side:**

- Hosting using Netlify and FireStore
- MySQL, Familiarity with NoSQL
- Serverless Applications using Express, NodeJS
- Knowledgeable about C# , C++, Java, Python

- **Testing & Methodologies:**

- Agile and Scrum Methodology
- Unit Testing and End-to-End Testing

- **Tools & Version Control:**

- GitHub for Version Control
- Familiarity with ESLint, Rally for Ticket Management

**Portfolio:**

- [ReactJS-Hotel-Project](#)
- [ExpenseTracker](#)
- [Personal Portfolio](#)
- [Car-List](#)
- [Twitter Clone Project](#)
- [Additional Project](#)
